

ShopSphere

Payment & Refund Policy

Effective date: 1 September 2026

Synthetic RAG demo document - created for learning and testing only. This is not a real company policy.

1. Accepted Payment Methods

- Major credit and debit cards supported at checkout.
- UPI and selected mobile payment methods where available.
- Net banking for supported banks.
- ShopSphere gift balance and promotional credits subject to their own terms.
- Cash on Delivery only on eligible products, pin codes, and order values.

2. Payment Authorisation

An order is confirmed only after ShopSphere receives a successful payment status from the payment processor, except for Cash on Delivery orders. A bank debit without an order confirmation may be a temporary authorisation or failed-payment debit and should normally reverse automatically.

3. Failed Payment Reversal

When payment fails but the customer account is debited, ShopSphere requests reversal immediately. Most bank or UPI reversals appear within **3 to 7 business days**, depending on the financial institution.

4. Refund Initiation After Approval

After ShopSphere approves a refund, the refund is **initiated within 2 business days**.

5. Refund Credit Time

Original payment method	Typical time after ShopSphere initiates refund
UPI	1-3 business days
Credit card	3-7 business days
Debit card	3-7 business days
Net banking	2-5 business days
ShopSphere gift balance	Usually within 24 hours
Cash on Delivery	Bank/UPI refund after customer provides verified payout details

The credit time above begins after ShopSphere initiates the refund. Bank processing time is controlled by the bank or payment provider and is different from ShopSphere approval time.

6. Partial Refunds

A refund may be partial when only some items in a multi-item order are returned, when a non-refundable service fee applies, or when a promotional discount must be proportionally adjusted. Any deduction should be shown in the refund breakdown.

7. Shipping and Convenience Charges

Original shipping or convenience charges are refunded only where required by the applicable return reason or where ShopSphere specifically states that the charge is refundable. A voluntary return may not include reimbursement of the original delivery charge.

8. Refund Destination

Prepaid orders are normally refunded to the original payment method. ShopSphere does not redirect a card refund to another card or bank account merely on request. Cash on Delivery refunds require verified payout information.

9. Refund Not Received

If the maximum stated bank processing time has passed, the customer should provide the refund reference number to the bank or payment provider. ShopSphere support can provide the available reference after refund initiation.
