Orders & Account Help

Effective date: 1 September 2026

Synthetic RAG demo document - created for learning and testing only. This is not a real company policy.

1. Order Status and Tracking

Customers can view current order status from My Account > Orders. Common states are Order Confirmed, Packed, Shipped, Out for Delivery, Delivered, Cancelled, and Return in Progress.

Tracking may take up to **12 hours** to appear after an order first changes to Shipped.

2. Order Modification

- Delivery address can be edited only before the order enters Packed status.
- Phone number can be updated before shipment if carrier processing has not started.
- Product quantity, colour, or size cannot be edited after payment; cancel the eligible item and place a new order instead.
- Seller-fulfilled orders may have stricter modification rules shown on the order page.

3. Cancellation

Most orders may be cancelled while their status is Order Confirmed. Once Packed or Shipped, cancellation may be unavailable. If cancellation is unavailable, the customer may refuse delivery when permitted or use the Return Policy after delivery.

Order state	Cancellation
Order Confirmed	Usually allowed
Packed	Usually not allowed
Shipped	Not allowed in the app
Out for Delivery	Not allowed
Delivered	Use return/exchange eligibility instead

4. Account Access

- Password reset links expire after 30 minutes.
- After five unsuccessful password attempts within 15 minutes, sign-in may be temporarily locked for 30 minutes.
- Changing the registered email requires verification of the existing email or another approved identity check.
- Customers should never share one-time passwords, card PINs, CVVs, or account recovery codes with support agents.

5. Guest Orders

Guest orders can be located using the order number and the email address or phone number used during checkout. A guest order is not automatically attached to a newly created ShopSphere account unless ownership

is verified.

6. Duplicate Orders

If a customer accidentally places the same order twice, each order remains independent. A duplicate order is not automatically cancelled. The customer must cancel an eligible duplicate before packing or use the normal return process after delivery.

7. Account Deletion

Account deletion requests can be submitted from Privacy & Account Settings. ShopSphere may retain transaction records that must be preserved for legal, tax, fraud-prevention, dispute, or accounting requirements. Active orders, open returns, or unresolved payment disputes may delay final deletion.

8. Support Escalation

A customer should contact support when tracking has not updated for 48 hours after the expected carrier scan, an order is marked Delivered but cannot be located, or an account remains locked beyond the stated lock period.
